

# Join Us To Discover

Industry Satellite Symposia, EAO 2019

**Date & Time:**  
Friday, 27 September  
17h15–19h15

**Location:**  
Room 10

## How To Combine Bone Regeneration And Orthodontics

**Prof. Rodrigo Neiva\*** (USA)

Prof. Neiva will present a treatment approach to accelerate orthodontic treatment and prevent dehiscence defects and gingival recessions associated to orthodontic arch expansion. The rationale, advantages and disadvantages for this technique will be discussed, as well as the graft material selection and its use for alveolar ridge augmentation to be done prior to, and during active orthodontic treatment.

## What Is Predictable, Possible And Impossible In Digital Dentistry?

**Prof. Guillermo Pradies\*** (Spain)

Digital dentistry is here to stay. As clinicians we must know the advantages as well as the limitations of the digital dental procedures. While intraoral scanners and digital designing and production methods are improving the daily clinical practice bringing accuracy and speed to the treatments, we should be aware of what's predictable, what's possible and what's impossible nowadays. We need to ensure successful and predictable treatments to our patients.
